Introduction:

The following index is intended as an alphabetical index to the box contents of the Roy W. Nagle collection. The access it provides is neither comprehensive nor item-specific; it is intended to refer searchers to boxes where materials have been grouped by Nagle himself according to subject. Often the subject series were determined from lectures he prepared on them.

Nagle's subject headings were extremely broad and vague; for example, "Old legal papers." In such cases, an effort was made to provide additional index entries for the major sub-series names and subjects.

General Notes on Individual Series Titles

1. **BUFFALO, CITY OF:** This label generally refers to legal papers that involve the Buffalo city government, as a party in litigation, in contracts, etc.
2. **LIFE IN BUFFALO:** Roy Nagle grouped materials under this heading if he thought they somehow reflected the general flavor of life in Buffalo in the 19th and early 20th centuries. They are usually obscure but rich in evidential value.
3. **MISCELLANEOUS,** unfortunately, has been assigned to 12 boxes in the collection and probably reflects materials which Roy Nagle had not yet incorporated into his lectures or examined fully. Because these materials have not been given full item-level indexing at present, users are urged to examine the "Miscellaneous" boxes as thoroughly as possible, or at least the inventories to the), to check for additional material relevant to their subject.

General caveat: Interpret Subject Headings Broadly

"Civil War," for example, is a heading assigned to materials the majority of which long predate the actual military conflict, but which Roy Nagle apparently considered valuable documentation of the prehistory of the Civil War, or in which he recognized the names of persons who later went on to become well known for their actions in the war.

Other series titles are similarly loose in scope. What this means for the researcher is that indexed subject headings or series titles that appear to be only tangentially relevant may, upon closer examination of the boxes they refer to, provide access to significant materials.
